

SUMMARY

An "Engineer-First" GenAI & LLM Engineer with 2+ years of experience specializing in architecting and deploying enterprise-scale AI solutions. I bridge the gap between AI research and production by designing **Agentic Workflows (LangGraph)**, building robust **RAG pipelines**, and implementing rigorous **LLMOps/Model Monitoring**. With a strong foundation in backend system architecture, I leverage AI-assisted development tools to rapidly prototype, iterate, and deploy scalable Python/FastAPI systems that drive measurable business impact and automate complex processes.

TECHNICAL SKILLS & CORE COMPETENCIES

GenAI & LLMOps:	Agentic Workflows (LangGraph/LangChain), RAG Pipelines , Prompt Engineering, LLM Tracing & Monitoring (LangSmith, Langfuse), Context Engineering
Models, Tools & Data:	Multi-Modal LLMs (Claude , Gemini, OpenAI, Llama 3), PyTorch (Fundamentals), Huggingface , LoRA Fine-Tuning (Stable Diffusion), Vector Databases (ChromaDB/FAISS), ML Pipelines, Git, Claude Code , Cursor IDE , VS Code , Github, Hermes Agent
Backend & Cloud:	Python, FastAPI, SQL/NoSQL , Docker (basics), CI/CD (GitHub Actions), Azure/AWS (Basics), Cloudflare R2 , VPS
Core Engineering:	System Design & Architecture, REST API Design, Object-Oriented Design (OOD), Data Structures & Algorithms, Deep Learning Concepts, Robotics

PROFESSIONAL EXPERIENCE

AI Developer | GenAI and LLM Engineer | Research & Development Team | Aug 2025 – present

Ducon Industries, Dubai

- Business Impact & Agentic Design Engine:** Engineered a dynamic, multi-agent generative design platform (Python/FastAPI) using **LangChain/LangGraph**. By automating the initial design and visualization process, the system successfully reduced designers' "creative cognition time" by **35% per client session**, significantly accelerating the sales conversion cycle.
- RAG Infrastructure & Semantic Search:** Architected an Enterprise Project Library (Python/FastAPI) featuring an end-to-end **RAG pipeline**. Embedded and indexed **thousands** of proprietary design assets into a **ChromaDB Vector Store**, enabling natural language **semantic search** that replaced legacy keyword systems and accelerated asset retrieval.
- LLMOps, Cloud Deployment & Data Pipelines:** Orchestrated VPS deployment and built automated Python pipelines utilizing **Vision LLMs** for unstructured data extraction, saving **100+ manual hours**.
- Designed **self-correcting** evaluation loops integrated with **LangSmith/Langfuse** for continuous model monitoring and **tracing**.
- Deep Learning R&D:** Spearheaded R&D utilizing **PyTorch** to fine-tune Stable Diffusion models trained custom **LoRAs** via Kohya_ss on historical master plans to benchmark local image synthesis versus API-driven multi-modal generation

Software Engineer Intern(.NET) | Jan 2025 – July 2025

DeltaX, Hyderabad, India

- Scalable Backend Architecture:** Engineered production-grade backend systems (C#/.NET Core), delivering **20+ RESTful APIs** with normalized SQL databases and Controller-Service-Repository patterns, establishing the rigorous system design foundation I now apply to ML infrastructure.

SIDE PROJECTS

Distributed AI Systems (Atomic Sensei) | System Design & Architecture, Context Engineering

- Architected a full-stack, multi-agent AI educational platform** capable of dynamic roadmap generation. Engineered complex **asynchronous data workflows** to manage seamless communication between LLMs, Supabase databases, and event-driven edge functions (cron jobs), demonstrating a deep grasp of scalable system design.

AI-Driven Robotics | Computer Vision & Real-Time Integration

- Developed an award-winning, vision-integrated robotic system**, validated by a **3rd Place Win at a National Hackathon**, by integrating a **Vision LLM (Gemini)** with a Python-based control pipeline and Arduino hardware.

LEADERSHIP EXPERIENCE

Vice Chair & Technical Lead | 2022 – 2025

TSIG – Engineering Club

- Collaborated with cross-functional teams** of developers and domain experts to translate project requirements into technical specifications and deliverables for over **10+ concurrent projects**.
- Led a 30-member engineering organization**, overseeing the lifecycle of **10+ technical projects** and implementing process improvements that increased project completion rates by **25%**.

EDUCATION & ACHIEVEMENTS

Bachelor of Engineering, Computer Science & Engineering

Muffakham Jah College Of Engineering and Technology, **Osmania University**, India

- Winner & Special Mention** at multiple hackathons (HackRevolution, IIT Hack4SDG state-level).
- Published Researcher (National Conference)** on an innovative robotic mechanism.
