SUMMARY

A versatile and innovative Software Engineer with a dual specialization in **.NET backend development** and **Python-based AI systems**. My experience is built on a foundation of architecting and developing robust applications, from enterprise-grade services using C# to award-winning AI/Robotics prototypes. I am a proven technical leader with a passion for clean code, scalable architecture, and solving complex, multi-domain problems.

TECHNICAL SKILLS & CORE COMPETENCIES

Languages	Python, C#, JavaScript, SQL (T-SQL), Java, C++, HTML5, CSS3
Backend	.NET Core, ASP.NET Core, REST APIs, Entity Framework Core, Dapper
AI & Machine Learning	Generative AI, LLM Integration (Gemini API), RAG Systems, Prompt Engineering, Scikit-learn, Pandas, NumPy, Matplotlib
Databases	MS SQL Server, Relational Database Design & Normalization, FAISS
Tools & Platforms	Git, Visual Studio, Postman, VS Code, ChatGPT, Claude, AI Tools, Gemini, SDK, Copilot
CS Fundamentals	System Design & Architecture, Data Structures & Algorithms, OOP, Software Design Patterns, SDLC, Agile Methodologies

PROFESSIONAL EXPERIENCE

Software Engineer Intern (.NET) | Jan 2025 – July 2025

DeltaX

- Engineered two production-grade backend systems using **C# and .NET Core**, demonstrating end-to-end ownership from architectural design to implementation.
- Architected and implemented a full suite of **RESTful APIs**, applying a clean, layered architecture (Controller, Service, Repository) to ensure modularity and maintainability.
- Designed and normalized a complex **MS SQL Server** database, writing efficient queries and handling data serialization for a high-traffic e-commerce style application.
- Practiced **Dependency Injection (DI)** and **OOP principles** extensively to write loosely coupled, testable, and reusable code suitable for an enterprise environment.

LEADERSHIP & TECHNICAL EXPERIENCE

VICE CHAIR & TECHNICAL LEAD & Mentor | 2022 - 2025

TSIG – Engineering Club, MJCET

- Provided technical support and guidance to over 30 junior developers**, mentoring them on best practices in coding, debugging, and project management.
- Assisted in the design and architecture planning** for **10+** multi-domain projects, translating abstract ideas into concrete technical plans.
- Led code reviews to ensure high standards of quality and maintainability, directly contributing to the successful delivery of multiple complex applications.
- Fostered a collaborative team environment**, leading to the successful delivery of multiple award-winning projects at national hackathons.

PROJECTS

AI Robotic Arm (Python, Generative AI & System Integration)

- Developed a pilot integrating a physical robotic arm with Google's Gemini Vision LLM, creating an intelligent, voice-commanded system. This project showcased skills in Python, hardware control (PySerial), and cutting-edge **Generative AI** API integration.
- Winning Hackathon Project**

Atomic Sensei (System Architecture & Design)

- Demonstrated innovative thinking by architecting a full-stack AI-powered web application from concept to technical specification, focusing on scalability and user experience.

Webprint (JavaScript & Developer Tooling)

- Built and published a VS Code extension using **vanilla JavaScript** that generates real-time, interactive HTML wireframes, demonstrating strong frontend fundamentals and the ability to create valuable developer tools.

EDUCATION & ACHIEVEMENTS

Bachelor of Engineering, Computer Science & Engineering (CGPA: 8.27) | 2021 - 2025

Muffakham Jah College Of Engineering and Technology, Osmania University, India

NEW INDIAN MODEL SCHOOL, DUBAI – 10th CBSE Board | 92% | 2007 – 2019

- Top 50 in India**, ISRO Rover Design Competition.
- Published Researcher** (National Conference) for a novel Core XY robotic mechanism.
- Winner & Special Mention** at multiple national-level hackathons (HackRevolution, IIT Hack4SDG).
