SUMMARY

AI Developer who has shipped a production multi-agent AI product in live commercial use. At Ducon Industries, I built and launched **SAIF AI Designer** (LangGraph, RAG, Gemini): **57 client designs** in its first 4 weeks, **~70% faster** generation, **35% less** designer time per client session, and **40 internal users** across sales, design and R&D. Engineer-first: started in C#/.NET backends, now Python and agentic AI. Strong in system design, RAG, LLM reliability and data pipelines, and I own deployment end to end.

TECHNICAL SKILLS & CORE COMPETENCIES

AI / LLM and GenAI:	**LangGraph**, LangChain, **RAG**, **agentic** workflows, prompt & **context engineering**, LLM evaluation, LangSmith, Langfuse, Claude, Gemini & OpenAI APIs, image-generation models, embeddings
Data:	PostgreSQL/pgvector, ChromaDB, SQL Server, Supabase, SQL (joins, subqueries, schema design), data pipelines (unstructured images/docs → structured data)
Backend:	**Python** (FastAPI), REST API design, C#, ASP.NET Core, EF Core, Dapper
DevOps & Tools:	**Railway**, Docker, **VPS** hosting, **Cloudflare** R2, Git, Cursor, **Claude Code**, GitHub Copilot
Core Engineering:	System Design & Architecture, REST API Design, Object-Oriented Design (OOD), Data Structures & Algorithms, Deep Learning Concepts, Robotics

PROFESSIONAL EXPERIENCE

AI Developer | Research & Development Team **|** *Aug 2025 – present*
Ducon Industries, Dubai
Product: SAIF AI Hardscape Designer, live on WhatsApp (+971 56 505 0775)

- **Commercial impact:** Launched **SAIF AI Designer**: a client sends a photo of their space and receives a rendered outdoor design with a Bill of Quantities. **57 client designs** delivered in the first 4 weeks, before the marketing launch.
- **Faster sales cycle:** Cut designers' "creative cognition time" by **35% per client session**, speeding up the sales conversion cycle.
- **Performance:** Cut end-to-end generation time from **20+ min to 5–7 min (~70%)** by parallelizing agent nodes, tuning thinking levels per node, moving to Gemini Flash, and moving deterministic logic from LLMs into code.
- **Adoption:** Rolled out to **40 internal users** across sales, design and R&D, and turned their feedback into features: edit-generations, multi-step generation and night-view renders.
- **Architecture:** Multi-agent LangGraph pipeline on Python/FastAPI. A planner agent grounds every design in Ducon's real catalogue with structured and semantic RAG (PostgreSQL/pgvector), so renders and BOQs use only real, sellable products.
- **Reliability & evaluation:** Strict JSON schemas, code and LLM validation nodes, and a generate → evaluate → regenerate loop for images. Built an evaluation dataset and traced runs in LangSmith and Langfuse to benchmark models before release.
- **Data & infrastructure:** Built pipelines that turned unstructured project images and documents into a structured, embedded design library, plus a FastAPI + ChromaDB semantic search over thousands of images. Automation scripts saved **100+ manual hours**. Owned deployment (Railway, VPS, Cloudflare R2, databases).

Associate Software Product Engineer Intern | *Jan 2025 – July 2025*
DeltaX, Hyderabad, India

- Built two backends (an IMDB-style catalogue and BookSwap, a book marketplace) in C#/ASP.NET Core and SQL Server: **20+ REST endpoints**, a layered Controller–Service–Repository design and a **history-based recommendation engine**.

SIDE PROJECTS

Atomic Sensei | Multi-agent AI learning platform | *(Drive Link)*

- Designed the architecture and data model: roadmap, lesson and quiz-evaluation agents (Gemini) with async lesson pre-generation and cron-driven Supabase edge functions for reminders.

AI-Driven Robotics | Computer Vision

- **3rd place, national hackathon:** robotic arm controlled by a vision LLM (Gemini) through a Python control pipeline and Arduino.

LEADERSHIP EXPERIENCE

Vice Chair & Technical Lead | *2022 – 2025*
TSIG – Engineering Club

- Led a **30-member** engineering club, delivering **10+** concurrent projects across AI, web and robotics and raising project completion rates by **25%**.

EDUCATION & ACHIEVEMENTS

Bachelor of Engineering, Computer Science & Engineering
Muffakham Jah College Of Engineering and Technology, ***Osmania University****, India*

- **Winner & Special Mention** at multiple hackathons (HackRevolution, IIT Hack4SDG state-level).
- **Published Researcher (National Conference)** on an innovative robotic mechanism.
